Get the facts
about the vaccine

Confused about what's true or false when it comes to COVID-19 vaccines? We get it. These facts will help you separate rumors from reality.

Are vaccines safe?

YES All COVID-19 vaccines have been rigorously tested. Tens of millions are already vaccinated, and scientists continue to monitor vaccine safety.

Are vaccines effective?

YES Vaccines are your best defense against getting COVID-19. Vaccinated people have almost zero chance of getting seriously ill from the virus.
Are side effects normal?

YES Some people get sore muscles, a mild fever or feel tired after getting a vaccine. These normal reactions mean your body is learning how to fight the virus.

Can the vaccine give me COVID-19?

NO The vaccines do **not** contain live viruses. Getting vaccinated will **not** result in a positive COVID-19 test.

What does "fully vaccinated" mean?

The vaccines give you maximum protection from COVID-19 two weeks after your second shot of either Pfizer or Moderna or two weeks after a single dose of Johnson & Johnson.
