

FAQs for Sacramento County Attestation

What is a County Attestation?

On May 7th, as directed by the Governor in Executive Order N-60-20, the State Public Health Officer issued a local variance opportunity through a process of county self-attestation to meet a set of criteria related to county disease prevalence and preparedness. This variance allowed for counties to adopt aspects of Stage 2 at a rate and in an order determined by the County Local Health Officer.

Basically, it means counties can move quicker into Stage 2 than the state because they've proven they can meet specific criteria about the stability of COVID-19 spread and the levels of County preparedness.
